Conveyors / Gravity Conveyors Components

600mm Wide Gravity Conveyor with Steel Rollers - 1.5m Long

Model Number: CGR094

Key features

Product Name : Gravity Conveyor

Length (A) mm: 1500

Pitch (mm): 115

Overall Width (B): 600

No of Rollers: 13

Roller Material: Steel

Gravity roller conveyors provides essential material handling free moving, efficient and safe transportation of goods at any operational stage of a conveyor line on a daily basis. Gravity roller conveyors are an economical solution ideal for moving heavy and non standard shaped items along processing and packaging lines. Providing flexibility with innovative interlocking sections supplied as standard in 1.5 and 3m sections allowing for addition and subtraction of a conveyor line as required. Richmond Gravity conveyor have been designed with thicker channeling, stronger cross members and a high quality powder coated finish for hard wearing and maximum rigidity over the full length of any hard working conveyor line.It is recommended that there be a minimum of three rollers under the goods to being transported at any one time. The size of the object being transported can help determine the roller pitch on your conveyor system applying the three roller rule. Richmond can custom manufacture gravity conveyor systems to suit your length, width, pitch and roller requirement.
