Conveyors / Gravity Conveyors Components / 290mm Wide Gravity Conveyors

290mm Wide Gravity Conveyor with Steel Rollers - 3m Long

Model Number: CGR079

Key features

Product Name Gravity Conveyor

Length (A) mm 3000

Pitch (mm) 150

Overall Width (B) 290

No of Rollers 20

Roller Material Steel

Gravity roller conveyors are an essential material handling solution for conveyor line applications, allowing for the free moving, efficient and safe transportation of goods at any operational stage of a conveyor line on a daily basis. If you're interested in buying gravity conveyors in Melbourne, Sydney, Brisbane, Darwin, Adelaide or Perth, look no further than Richmond for a wide range of high-quality options.

Benefits And Features

Richmond gravity conveyors are specially designed with thicker channelling, stronger cross members, and a high-quality powder coated finish for hard wearing and maximum rigidity over the full length of any hard working conveyor line. Providing an economical solution for moving heavy and non standard shaped items along processing and packaging lines, they're also an incredibly flexible option.

Whether you reside in Sydney, Melbourne, Brisbane or elsewhere in Australia, we can provide innovative interlocking sections supplied as standard in 1.5 and 3m sections. This allows for additions or subtractions to your conveyor line as required.

We recommend that there be a minimum of three rollers under your transported goods at any one time. The size of the object being transported can help determine the roller pitch on your conveyor system applying the three roller rule.

Learn More Today

Richmond can custom manufacture gravity conveyor systems to suit your length, width, pitch and roller requirements. To discover our available options, contact us online or drop into one of our stores in Melbourne, Darwin, Sydney, Brisbane, Perth and Adelaide.
