Mighty Tough 12" Pneumatic Hand Trolley

Model Number: MTR102

Key features

Every detail of the MTR102 has been developed, tested and designed in Australia by our in-house engineering team to outperform ordinary trolleys in real-world environments. Compared to mass-produced models from others, the Mighty Tough delivers more steel, more welds and more structural reinforcement especially in high-stress zones where trolleys typically fail. The MTR102 features a wider frame for increased load stability, making it ideal for transporting larger boxes, crates and cartons. No bolt-on axles. No flimsy toe plates. No lightweight frames. Just solid, job-ready performance built to last.

• Built for heavy-duty use: Designed for daily industrial and commercial applications

• Heavy-wall steel tubing: Stronger than standard frame material, built to resist bending and fatigue

• Fully welded one-piece axle: No bolts or brackets — ensures long-term strength and consistent tracking

• Reinforced toe plate: Rigid under heavy loads with a curved front for easier entry beneath items

• Pneumatic wheels:150mm air-filled tyres cushion impacts and reduce rolling effort on uneven ground

• Wider frame design: Offers improved load stability for oversized or bulkier items

• Precision axle seating: Bearings held securely with internal stoppers and split pins for long-term performance

• High-vis Richmond Yellow powder coat: Durable coating for visibility and chip resistance in rough environments

• Ergonomic hand grips: Textured handles for comfort and control during prolonged use

!Please note: This product is supplied flat-packed for ease of transport

Specifications

Product Code	MTR102
Maximum Load Capacity (kg)	300
Trolley Size (mm)	1180 x 370
Toe Plate Size (mm)	350 x 280
Wheel Type	Pneumatic
Tyre Size	13 X 5.00 X 6
Wheel Diameter (mm)	320
Wheel Code	PN1271-1FL
