Wheels / Concrete Agitator Rollers

McNeilus 3-7/8" Complete Roller Assembly – Heat-Treated C45 Steel Roller | Ductile Iron Bracket | 455/453A Bearing

Key features

Heavy-duty replacement roller assembly designed for McNeilus refuse truck applications.

- Complete McNeilus 3-7/8" roller assembly
- Forged C45 steel roller for high strength and durability
- Heat-treated roller surface for increased wear resistance
- Surface hardness of 50-55 HRC
- Hardened wear depth of 7-8 mm
- Heavy-duty GB QT500 ductile iron bracket
- Precision 455/453A tapered roller bearings
- Steel-backed NBR rubber oil seals for contaminant protection

- Designed for demanding refuse truck and compactor applications
- Complete pre-assembled unit for simplified installation

Specifications

Roller Size	3-7/8"
Roller Material	Heat-Treated Forged C45 Steel
Surface Hardness	50–55 HRC
Hardnened Depth	7-8mm
Bracket Material	Ductile Iron (GB QT500)
Bearing	455 /453A Tapered Roller Bearing
Oil Seal Material	Steel / NBR Rubber
Base Length (mm)	282
Base Width (mm)	215
Mounting Base Length (mm)	207
Mounting Hole Spacing (mm)	132
Overall Height (mm)	228
Roller Diameter (mm)	203.7
Roller Width (mm)	99
