

Casters / Spring Loaded Shock Absorbing

125mm Poly Spring Loaded Swivel Castor with Brake

Model Number: S5088B

Key features

Designed to reduce the impact of shocks during transport, providing smoother movement, reduced risk of damage, and a quieter ride. Richmond's new shock absorbing castors are ideal for use in applications with uneven surfaces or where debris is present. They are also great for moving delicate items where additional vibration and shock to the load could cause damage.

During transport over uneven surfaces the spring supports the load, absorbing the impact instead of transferring it all to the item being transported.

Specifications

Product Code	S5088B
Wheel Diameter (mm)	125
Frame Type	Swivel with Brake
Wheel Width (mm)	50
Wheel Type	Polyurethane Tyred Cast Iron Centred
Wheel Bearing Type	Ball Bearing
Castor Height (mm)	194
Swivel Radius (mm)	119
Maximum Load Capacity (kg)	200
Recommended Load Capacity (kg)	100
