

2 Tonne Steerable Load Skate

Model Number: LSR012

Key features

Steerable load skate designed for moving machinery and equipment up to 2000kg across smooth industrial floors in warehouses, workshops, and maintenance environments.

- 2000kg load capacity: Suitable for transporting medium to heavy machinery and equipment in controlled industrial environments.
- Three roller configuration: Equipped with three rollers measuring 80mm x 70mm for stable load distribution and smooth movement.
- Swivel top plate: Rotating plate allows the load to be guided and positioned with improved control.
- 360° swivel castors: Enables multi-directional movement for navigating tight spaces and corners.

- Removable steering handle: Includes a 1080mm connecting handle for improved steering and control during transport.
- Heavy duty steel construction: Designed for regular use in workshop, warehouse, and machinery relocation tasks.

Specifications

Product Code	LSR012
Safe Working Load (tonnes)	2
Roller Size (mm)	70 x 80
No of Rollers	3
Plate Diameter (mm)	150
Overall Dimensions (mm)	621 x 450 x 110
