

Casters / Agricultural Castors

Agricultural Castor with Pneumatic Wheel

Model Number: S1671

Key features

Richmond's agricultural castor pneumatic wheel is Australian manufactured and designed to be mounted onto a large range of farming machinery.

Manufactured from a zinc coated steel, the new fork design multi stud swivel assembly allows for quick and easy installation onto most farming equipment minimising rust and increasing the wheels lifespan. Easily customise your agricultural castor pneumatic wheel with an optional universal 4/5 stud pattern. Your existing Ford, Holden or Toyota Hilux hub stud patterns can easily be manufactured to suit.

The pneumatic wheel has a 400mm diameter and a 100mm tyre width. (400 x 6ply heavy duty tyre) with a comfortable cushioning effect of compressed air and tyre for a smooth ride. The strong steel centre ensures a durable longer lasting wheel. The Heavy duty 2-piece bolt together rim enables easy maintenance and removal.

Richmond's pneumatic wheel reduces the pressure of the tractors mounting point, riding on the surfaces when soil is wet and muddy.

Specifications

Product Code	S1671
Tyre Diameter (mm)	400
Tyre Width (mm)	94
Boss Width (mm)	94
Tyre Size	4.00-8
Wheel Bearing Type	Ball Bearing
Maximum Load Capacity (kg)	300
Weight (kg)	18.5
Wheel Code	PN1616
