

Plastic Storage

780L Megabin Solid

Model Number: BNR101GRY

Key features

Richmond's Solid One Piece Megabins are constructed from recyclable 100% HDPE, and are food grade and UV Stabilised. This means that our megabins are also resistant to moisture, bacteria, mould and disease carrying organisms, unlike wooden pallets. Our mega crates have a huge advantage over wooden crates – they never change weight, because they never absorb water. Our solid and vented megabins are up to 40% lighter than wooden bins, allowing for an increase in freight efficiencies of 4-5%.

External Dimensions: 1162mm x 1162mm x 780mm

Internal Dimensions: 1082mm x 1082mm x 650mm

Capacity: 780L

Our solid and vented megabins are designed for transporting produce, and the rounded edges and smooth interior surfaces reduce bumps and bruises, while small exterior pads reduce the likelihood of scratches. But these mega crates are not just for produce – they would be perfect for any retail bulk bin use too! We also offer vented megabins, in order to increase airflow. This allows your produce to cool at a faster rate, increasing shelf-life.

Richmond's high-quality megabins are also stackable, with positive interlocking feet to ensure stability and speed. There's no need to waste time or floor space with our megabins – we know how valuable it is. With the potential for up to 5000kgs of static stacking in cold storage, Richmond's vented and non-vented stackable megabins are the ideal produce storage solution.

Our megabins even have a larger forklift entry height than wooden pallets, making the process even simpler. And with over 59 years of experience in the material handling industry, we know what we're talking about. Looking for a forklift or pallet jack to move your megabins? Browse our range!

And that's not all – our one piece megabins also have a huge 780L volume! Our mega crates are everything you've come to expect from Richmond products – tough, reliable and of the highest-quality.
