## 40mm x 40mm Heavy Duty Knock in Bearing Hinge

Model Number: GTR199

### Key features

Simple to install and made to last, this pair of heavy-duty Knock-In Bearing Hinges will instantly improve your gate operation and gate motor's lifespan.

Designed to fit inside 40mm x 40mm steel tubing, these hinges are ideal for gates up to 300kg and 2 metres in length. Delivering a smooth gate performance with zero resistance through 180°, these hinges are a great investment to ensure the reliable operation of your gate and to preserve your current gate motor!

What are the benefits of our Knock-In Bearing Hinges?

- Easy installation by simply knocking in the hinge on both ends of gate frame
- Delivers ultra smooth gate operation during opening and closing

- Zinc plated forged A3 steel hinge section for added durability
- Ideal for prolonging the life of your gate motor so there's no drag
- Heavy-duty design for gates up to 300kg and to 2 metres in length

Why choose Richmond Wheel & Castor Co for your Bearing Hinges?

Often overlooked, bearing hinges are the most important component of a fencing and gate set-up. Not only will they improve its operation but they'll also protect your motor from unnecessary gate drag.

As one of Australia's leading suppliers of automatic gate systems, Richmond Wheel & Castor Co. has all of the accessories you need to ensure the ongoing performance of your gate for many years to come!

There are a range of factors to consider when choosing the right pair of bearing hinges for your gates, such as the height and width of your gate, the overall weight, and its opening frequency.

If you're looking to add bearing hinges to your automatic gates and aren't sure where to start, simply get in touch with our expert gate team!
