

Casters / Furniture & Bed Castors / Weight Activated Furniture Castors

Pack of 2 Weight Activated Brake Castors

Model Number: S059PK2

Key features

Richmond's new weight activated furniture castors feature a spring-loaded brake to keep your chair from rolling away when not in use. When sitting down and placing weight on the castor, the brake will release allowing you to roll around in your chair as normal. When getting up from your chair, the castor will lock the wheel in place.

Designed to suit most office chairs, these castors feature a wire clip fitting. Grey polypropylene wheels will help your chair or office furniture glide effortlessly across carpeted and tiled surfaces. When there is no weight on the castor the brake will activate. 10kg is required to release the brake of the castor.
