

Plastic End Caps

Richmond supplies durable plastic end caps designed to provide a neat, protective finish for round, square and rectangular tubing. Ideal for trolleys, furniture, racks and fabricated frames, our tube end caps help protect floors, seal open tube ends and improve the durability and appearance of commercial and industrial equipment.

Plastic End Caps

Richmond supplies durable Plastic End Caps for sealing and finishing open tube ends on trolleys, racks, fabricated frames, furniture and general industrial equipment. Available for round, square and rectangular tubing, these components help protect exposed edges, reduce contact damage and provide a cleaner finished appearance.

Browse Round End Caps, Square End Caps and Rectangular End Caps.

Tube End Protection for Fabricated Equipment

End Caps are pressed into open tubing to cover sharp or unfinished edges. They are commonly used on fabricated steel frames, shelving, trolleys, stands and workshop equipment where exposed tube ends could mark floors, collect debris or create an incomplete finish.

Correct sizing is important, as the cap must suit the tube profile and internal dimensions. Richmond also supplies related Castor Components, including Levelling Feet & Tube Inserts, Castor Fittings and Fasteners.

Product Types by Application

Round End Caps

Round End Caps are designed for circular tube used in handles, rails, frames and fabricated equipment.

They close the tube opening and help protect surrounding surfaces from direct contact with exposed metal edges.

Square End Caps

Square End Caps suit square tube used in trolleys, shelving, benches and industrial frames.

The push-in design provides a simple finishing solution while helping keep dirt and debris out of the tube.

Rectangular End Caps

Rectangular End Caps are made for rectangular hollow sections used across fabricated structures and material handling equipment.

They provide edge protection and a clean finish without requiring welding or permanent closure of the tube.

Applications by Industry

- Trolley Manufacturing: Plastic End Caps for handles, frames and exposed tube ends.
- Fabrication Workshops: Round, square and rectangular End Caps for finished metalwork.
- Warehousing: Tube End Caps for racks, barriers and handling equipment.
- Retail & Commercial: Protective End Caps for display stands, fixtures and furniture frames.
- Industrial Equipment: Push-in End Caps for machinery frames, supports and mobile equipment.

Castor Components Across Australia

Richmond supplies Plastic End Caps and related castor components throughout Australia. With over 65 years of experience and in-house engineering support, Richmond can assist with component selection for standard fabrication and custom equipment projects.
