

Wheels / Single Flange & Double Flange Track Wheels / Beam Trolley Track Wheels

130mm Beam Trolley Track Wheel 30mm Axle Diameter

Model Number: BT130

Key features

Beam trolley wheels are often seen on overhead cranes and carriages, movable platforms, construction, assembly lines, storage systems, heavy duty applications, building applications and manufacturing process systems. Our standard range of beam trolley wheels has been designed to fit standard channel and beam sections.

Wheel: 130mm diameter x 37mm wide rim

Flange: 159mm diameter x 37mm width

- M30 axle bolt with hexagon recess for reliable adjustment
- 750kg Load Capacity
- Double row angular contact ball bearings for increased the load capacity and side loading capacity compared to traditional beam trolley wheels with single row ball bearings.

We can also custom manufacture beam trolley wheels to suit your application. Contact our expert team for more information

Specifications

Product Code	BT130
Wheel Diameter (mm)	130
Rim Width (mm)	37
Flange Diameter (mm)	159
Flange Width (mm)	8
Material	SG Iron
Material	SG Iron
Axle Thread	M30
Maximum Load Capacity (kg)	750
