

4 Tonne Steerable Load Skate

Model Number: LSR013

Key features

Heavy duty steerable load skate for moving machinery and equipment up to 4000kg on smooth industrial floors in warehouses, workshops, and maintenance environments.

- 4000kg load capacity: Suitable for shifting heavy machinery, plant, and equipment in controlled industrial environments.
- Swivel plate design: Rotating top plate helps guide loads around corners and into tighter positions with better control.
- 360° swivel castors: Allows smooth multi-directional movement during transport and positioning.
- Removable connecting handle: Supplied with a standard 1080mm handle for easier steering and load control while moving.

- Heavy duty steel construction: Built for regular use in demanding workshop, warehouse, and machinery relocation applications.

Specifications

Product Code	LSR013
Safe Working Load (tonnes)	4
Roller Size (mm)	70 x 80
No of Rollers	5
Plate Diameter (mm)	200
Overall Dimensions (mm)	698 x 522 x 110
