

Casters / Extra High Performance

400mm Twin Wheel Swivel 10 Tonne Load Castor

Model Number: S1652D

Key features

The S1652D from Richmond Rolling Solutions is a swivel frame castor and uses a polyurethane tyred cast iron wheel. This swivel castor is part of our extra high performance series range and can hold loads up to 10,000kg. The S1652D uses taper roller bearings for wheel rotation. This castors swivel frame allows the castor to swivel 360°. The diameter of the polyurethane tyred cast iron wheel is 400mm and can be ordered separately (PU1606).

This castor includes a directional lock - This feature locks the swivel direction of the castor but still allows the wheel to turn. When the directional lock is released, full swivel function is returned to the castor. Castors with a directional lock are indicated by a 'D' at the end of the castor code.

Specifications

Product Code	S1652D)
Wheel Diameter (mm)	400
Frame Type	Swivel with Directional Lock
Wheel Type	Twin Polyurethane Tyred Cast Iron Centred
Wheel Code	PU1606
Wheel Bearing Type	Taper Roller Bearing
Castor Height (mm)	610
Swivel Radius (mm)	318
Maximum Load Capacity (kg)	10000
