

Castors / Utility Series / Utility Twin Wheel / Utility Series Bolt Twin Wheel Castors

75mm Twin Wheel Utility Bolt Castor

Model Number: S3720B

Key features

The S3720B Swivel with Brake Twin Wheel castor with Institutional Rubber wheels is part of our Utility Series castor range, designed for light-duty applications including trolleys, display equipment, wire baskets and other mobile equipment.

- **Swivel Brake Frame:** Swivel castor with an integrated wheel brake to stop rolling when required. Allows equipment to be moved freely and then secured in position during use.
- **Twin wheel design:** Twin wheel configuration helps distribute the load across two wheels for improved stability and smoother movement, while maintaining a compact castor design.

- **75mm diameter Institutional Rubber wheels:** Designed for light duty indoor use, institutional rubber wheels feature a non-marking rubber tyre that delivers quiet operation and floor protection. Commonly used in hospitals, schools, and commercial environments where smooth movement and low noise are important.
- **Pressed metal construction:** zinc-plated pressed steel frame for durability and strength.
- **80kg load capacity:** suitable for transporting loads of up to 80kg per castor.
- **Bolt-Hole Mount:** Simple single 12mm bolt-hole fixing makes the castor easy to fit to compatible equipment, including tube ends with threaded inserts or suitable pintle fittings. A range of pintle fixing options are available for different mounting requirements.
- **Suitable for a wide range of applications:** Institutional rubber wheels provide quiet, non-marking movement for light-duty applications. These castors are well suited to trolleys, carts and mobile equipment used in offices, schools, retail environments, hospitals, healthcare facilities, light trolley use and other indoor environments where floor protection and low noise are important.
