Frame Length (mm): 501

Frame Width (mm): 225

Plate includes: 49 x BTR422MS

Richmond's ball transfer plate easily and securely can be connected onto any Richmond 230mm conveyor frame.

Richmond's ball transfer plates are commonly used around presses, guillotines and machining centres, packaging warehouses and more. Richmond's ball transfers plates enable the smooth and simple transfer of products in any direction.

Consisting of a large load-bearing roller sitting upon many smaller balls encapsulated in a cup, the engineering in the design of our ball transfers makes for a perfect transfer station from one conveyor to another.

Contact Richmond today if you'd like to learn more about our ball transfer plates, browse our product range online or simply call our friendly staff on 1300 474 246. Alternatively, you can visit us in one of our stores, located in Melbourne, Brisbane, Sydney, Adelaide, Darwin, and Perth.
