90° Gravity Conveyor Bend 450mm Wide

Model Number: CBR008

Key features

Product Name Gravity Conveyor Bends

Roller Material Steel

Angle (A) Degree (mm) 90

Outside Radius (B) 1250

Overall Frame Width (C) 450

A conveyor bend can optimise space and remove the need for discontinuation and manual handling from a conveyor system. If you need to install bends in your gravity conveyor system, look no further than Richmond. We offer a great selection of gravity conveyor bends right across Australia, including in Sydney, Brisbane, Melbourne, Adelaide, Perth and Darwin.

Product Features

Providing all the features of Richmond's gravity conveyor system, our gravity conveyor bends are ideal for moving heavy and non standard items along processing and packaging lines that include 45 or 90 degree bends. These bends can be safely interlocked with straight conveyor sections whilst ensuring maximum efficiency for the goods being transported.

Our conveyor bends have been designed to be self tracking and free moving, making them suitable for various operational warehouse environments. They also come in a number of different configurations, including:

- Available with an outside radius of 1250 or 1410
- Available in overall frame widths of 290mm, 450mm or 600mm
- Available in 45 or 90 degree angles

Contact Richmond Today

To learn more about our gravity conveyor bends, get in touch with our team today by calling us on 1300 474 246. You can also drop into one of our stores in Melbourne, Sydney, Brisbane, Adelaide, Darwin and Perth, where we'll be happy to provide you with the advice and assistance you need to choose the best option.
