

Material Handling Equipment / Load Skates

Container Moving Skate

Model Number: LSR016

Key features

Container skate designed for relocating standard shipping containers across flat surfaces.

- **High Load Capacity:** Designed to safely move heavy containers and machinery loads up to 4000kg when used as a set.
- **Steerable Front Unit:** Turntable steering system with drawbar allows controlled positioning and directional movement in tight spaces.
- **Heavy Duty Steel Construction:** Robust fabricated steel frames provide strength and durability for industrial transport applications.
- **Twist Lock Top:** Integrated twist lock connection secures containers to the skate for stable and controlled transport.

- **Nylon Rollers:** Non-marking rollers protect floor surfaces while delivering smooth load distribution and reduced rolling resistance.
- **Modular Skate System:** Rear skates and front steer unit can be configured to suit different load sizes and weight distribution requirements..
