

Conveyors / Flow And Skate Rails

Flow Rail with Nylon Skates 3m Length

Model Number: FRR002

Key features

Product Name : Flow Rail

Length (mm): 3000

Roller Diameter (mm): 32

Roller Width(mm): 25

Frame Width(mm): 36

Overall Height(mm): 36

Skate: Nylon

Capacity: 60kg per metre

Flow Rail systems can be manufactured to suit each and every warehouse, gravity driven, the flow rail is ideal for applications where picking and stock turnover is frequent. Presenting on a stock rotation basis as inventory flows on a first in first out system, Richmond's flow rails allow for more efficient operation to personnel by reducing manual handling. Easily incorporated into racking or custom framing flow rail can provide unlimited solutions in the manufacturing industry. Setting us apart from our competitor, Richmond's Flow Rail features high quality nylon rollers securely riveted rather than being pressed into a metal frame creating a strengthened rigid smooth operation due to consistent rollability.
