

12 Tonne Adjustable Load Skate

Model Number: LSR002

Key features

Dual-skate system with adjustable connecting bar for safely transporting wide or uneven loads.

- **12 Tonne Load Capacity:** Designed to handle loads up to 12,000kg when used as a complete set.
- **Adjustable Width:** Connecting bar allows skate spacing to be set to suit different load sizes and shapes.
- **Dual Skate System:** Linked skates provide improved stability when handling wide or uneven loads.
- **Heavy Duty Steel Frame:** Powder-coated steel construction for durability in industrial applications.
- **Non-Slip Rubber Decks:** Rubber surfaces help stabilise and secure loads during movement.

- **Nylon Rollers:** Smooth rolling rollers designed for use on hard, level surfaces while helping reduce floor damage.
- **Load Distribution:** Multiple rollers help spread weight evenly to minimise point loading on floors.
- **Modular Use:** Can be used with additional skates for larger or more complex load configurations.

Specifications

Product Code	LSR002
Safe Working Load (tonnes)	12
Roller Size (mm)	85 x 90
No of Rollers	12
Roller Type	Nylon
Skate Dimensions (mm)	360 x 220 x 115
Adjustable Length	720-1500mm
