

30 Tonne Load Skate Kit

Model Number: LSR005

Key features

Heavy-duty load skate kit for transporting large machinery up to 30 tonnes with directional control and load stability.

- **30 Tonne Load Capacity:** Designed to handle heavy machinery and equipment loads up to 30 tonnes, only on clean and even concrete floors.
- **Four Piece System:** Includes two steerable front skates and two fixed rear skates for stable load support.
- **Adjustable Linking Bars:** Allows spacing to be set to suit different load widths and configurations.
- **Steerable Front Skates:** Provides controlled directional movement for positioning loads in tight or confined areas.
- **Heavy Duty Steel Construction:** Powder-coated frames built for durability in industrial environments.

- **Non-Slip Rubber Decks:** Helps secure and stabilise loads during transport.
- **Nylon Wheels:** Smooth rolling wheels suitable for use on hard, level surfaces.
- **Load Stability:** Multi-skate setup supports even weight distribution for safer handling of large equipment.

Specifications

Product Code	LSR005
Safe Working Load (tonnes)	30
Support Length (mm)	120
Support Width (mm)	120
Overall Height (mm)	117
Roller Diameter (mm)	24
Swivel Top (mm)	130
